

# Help your friends “love their look” too...

Recommend MemoryGel® Breast Implants and earn up to **TWO FREE** \$50 American Express® gift cheques

Friends share everything – including good advice.

You've had breast surgery using MemoryGel® breast implants and you're feeling fabulous. Why not tell your friends about what changed your life for the better? The Love Your Look® MemoryGel® Referral Program is Mentor®'s way of saying thank you for sharing your experience with MemoryGel® breast implants.

It only takes a few minutes to participate in the Love Your Look® MemoryGel® Referral Program.

**And it's easy. Just 4 quick steps.** **1.** Get a Program brochure from your Doctor **2.** Visit [www.LoveYourLook.com/ReferAFriend](http://www.LoveYourLook.com/ReferAFriend) and fill in information **3.** Your friend receives an email coupon code and brings that to her scheduled appointment. **4.** You can receive a \$50 American Express® Gift card for up to 2 friends who choose MemoryGel® Breast Implants for their augmentation. **That's it!**

Have questions? Just visit [www.LoveYourLook.com/ReferAFriend](http://www.LoveYourLook.com/ReferAFriend)

Now, giving great advice has its own reward.

The *MemoryGel® Referral Program* is not available to patients residing in Texas and Florida. Void where prohibited. Breast reconstruction surgeries do not qualify. Patients are encouraged to select a surgeon of their choosing after conducting their own investigation into the particular surgeon's training, education and experience.

**Important Safety Information:** Mentor® MemoryGel® breast implants are indicated for breast augmentation in women who are at least 22 years old or for breast reconstruction. Breast implant surgery should not be performed in women with active infection anywhere in their body, with existing cancer or pre-cancer of their breast who have not received adequate treatment for those conditions or are pregnant or nursing.

There are risks associated with breast implant surgery. Breast implants are not lifetime devices and breast implantation is likely not a one-time surgery. You may need additional unplanned surgeries on your breasts because of complications or unacceptable cosmetic outcomes. Many of the changes to your breast following implantation are irreversible (cannot be undone) and breast implants may affect your ability to breastfeed, either by reducing or eliminating milk production. The most common complications with MemoryGel® breast implants include reoperation, capsular contracture, asymmetry, and breast pain. A lower risk of complication is implant rupture, which is most often silent (meaning neither you nor your doctor will know you have a rupture). The health consequences of a ruptured silicone gel-filled breast implant have not been fully established. MRI screenings are recommended three years after initial implant surgery and then every two years after to detect silent rupture.

Detailed information regarding the indications, contraindications, warnings, precautions and the risks and benefits associated with Mentor® MemoryGel® breast implants are provided in two brochures available from your surgeon (*Important Information for Augmentation Patients about Mentor® MemoryGel® Silicone Gel-Filled Breast Implants* and *Important Information for Reconstruction Patients about Mentor® MemoryGel® Silicone Gel-Filled Breast Implants*) or on line at [www.Mentor-orp.com](http://www.Mentor-orp.com). It is important that you read and understand this information when considering Mentor® breast implants prior to deciding on surgery.
