

TELEHEALTH INFORMED CONSENT

Telehealth is healthcare provided by any means other than a face-to-face visit. In telehealth services, medical information is used for diagnosis, consultation treatment, therapy, follow-up, and education. Health information is exchanged interactively from one site to another through electronic communications. Telephone consultation, videoconferencing transmission of still images, e-health technologies, patient portals, and remote patient monitoring are all considered telehealth services.

_____ I understand that electronic communication cannot be used for emergencies or time-sensitive matters.

_____ I understand and agree that a medical evaluation via telehealth may limit my healthcare provider's ability to fully diagnose a condition or disease. As the patient, I agree to accept responsibility for following my healthcare provider's recommendations—including further diagnostic testing, such as lab testing, a biopsy, or an in-office visit.

_____ I understand that electronic communication may be used to communicate highly sensitive medical information, such as treatment for or information related to HIV/AIDS, sexually transmitted diseases, or addiction treatment (alcohol, drug dependence, etc.).

_____ I understand that my healthcare provider may choose to forward my information to an authorized third party. Therefore, I have informed the healthcare provider of any information I do not wish to be transmitted through electronic communications.
